

AKISHWAR. L

Data Engineer | Data Analyst | Python | SQL | ETL Pipelines | Backend Systems

■ Thanjavur, India ■ akishwar@email.com ■ +91-84893 78400
■ github.com/akishwar ■ linkedin.com/in/akishwar

PROFESSIONAL SUMMARY

Results-driven B.Tech AI & Data Science fresher (Final Year) with hands-on experience building ETL workflows, database systems, and data analytics pipelines. Processed **15,000+ records** across multiple data engineering and analyst projects using Python, SQL, and PostgreSQL. Optimized query performance by **40%** and engineered scalable backend systems handling **100+ concurrent users**. Seeking an entry-level **Data Engineer** or **Data Analyst** role to leverage expertise in data infrastructure, pipeline development, and business intelligence.

TECHNICAL SKILLS

Languages & Data:	Python (Pandas, NumPy, SQLAlchemy), SQL (PostgreSQL, Joins, Indexing, Window Functions), JavaScript, HTML, CSS
Data Engineering:	ETL Pipelines, Data Cleaning, Data Modeling, Data Warehousing, EDA, Statistical Analysis, Schema Design
Visualization & BI:	Matplotlib, Seaborn, Business Intelligence, Data Storytelling, Dashboard Reporting
Backend & APIs:	FastAPI, REST APIs, Backend Architecture, API Integration, Data Validation Pipelines
Cloud & DevOps:	AWS (S3, EC2), Docker, Git, GitHub, Jupyter Notebook, Version Control
Frontend:	React, Next.js, HTML, CSS

PROFESSIONAL EXPERIENCE

Part-Time Full Stack Developer | Freelance 2023 – Present

- Engineered PostgreSQL database schemas supporting **100+ concurrent users**, optimizing complex query performance by **40%** through strategic indexing and query refactoring.
- Architected and deployed **3 full-stack applications** with FastAPI backends, implementing RESTful APIs for real-time data exchange and seamless frontend integration.
- Designed data validation pipelines reducing input errors by **60%** and ensuring data integrity across application workflows.
- Integrated third-party APIs (authentication, payment gateways) ensuring **99.9% uptime** and reliable data synchronization between systems.
- Managed end-to-end Git workflows with **50+ commits**, conducting code reviews and maintaining production-ready codebases.

PROJECTS

Spotify Data Analysis | ETL & Analytics Pipeline github.com/akishwar

- Engineered end-to-end ETL workflow processing **5,000+ track records**; performed data cleaning and normalization improving dataset quality by **35%**.
- Architected PostgreSQL database schema with optimized table structures reducing data redundancy by **40%**.
- Analyzed correlation between audio features (tempo, energy, danceability) and popularity using statistical methods, uncovering key trend indicators.
- Developed **8+ interactive visualizations** with Matplotlib and Seaborn identifying top-performing genres and artist clusters.

Zomato Data Analysis | Data Pipeline Simulation github.com/akishwar

- Built complete data pipeline ingesting **10,000+ restaurant records**: extraction → cleaning → transformation → analysis.
- Implemented advanced data cleaning handling missing values, outliers, and inconsistencies improving data reliability by **45%**.
- Wrote optimized SQL queries with joins, aggregations, and window functions reducing retrieval time by **40%**.
- Extracted actionable insights on pricing strategies, ratings distribution, and location-based demand patterns; delivered executive summary reports.

TruthLens | AI Fake News Detection System github.com/akishwar

- Developed NLP classification pipeline using transformer architecture achieving **89% accuracy** on text classification tasks.
- Engineered FastAPI backend handling real-time prediction requests with **sub-300ms latency** and 95% uptime.
- Integrated multi-signal analysis combining ML predictions, sentiment analysis, and linguistic feature extraction improving detection by **25%**.

EDUCATION

B.Tech in Artificial Intelligence & Data Science Expected: May 2026

Dhanalakshmi Srinivasan Engineering College, Perambalur **CGPA: 8.00 / 10.0**

Relevant Coursework: Database Management Systems, Data Structures & Algorithms, Machine Learning, Statistics, Data Warehousing, Big Data Analytics

CERTIFICATIONS

- Tata Data Analytics Certification** (2024) — SQL, statistical analysis, data visualization, business intelligence
- Deloitte Data Analytics Certification** (2024) — Data storytelling, reporting frameworks, analytics strategy
- Python Programming Certification** — Advanced Python, data manipulation, automation scripting
